

PROTECT OUR COMMUNITY

SAY NO TO TELEGRAPH POLES

Why We Need Your Help

Our community is facing an important decision about how broadband services are delivered to our homes. Some companies are choosing to install unsightly telegraph poles instead of using underground infrastructure, which:

- Damages our neighbourhood's visual appeal
- Creates unnecessary street clutter
- Reduces property values
- Is an outdated approach to modern infrastructure

Important: You have the power to make a difference! By choosing not to subscribe to services delivered via telegraph poles, we can encourage companies to use proper underground infrastructure instead.

What You Can Do

- Ask your provider if they are using telegraph poles
- Choose providers that use underground infrastructure
- Spread the word to your neighbours and friends
- Support local campaigns against telegraph pole installations
- Sign our pledge to boycott overhead cables and support underground alternatives

Together We Can Make a Difference

Our community deserves modern, clean infrastructure that preserves the beauty of our neighbourhood. By making informed choices about our broadband services, we can ensure that companies respect our community's standards and values.

Join us in protecting our community's character and infrastructure.
